Summary

Innovative Software Engineer adept at working with customers, team members and project leaders to accomplish software engineering and updating tasks according to timelines. Skilled working with wide range of front and back-end technologies to produce and evaluate code.

Some of the key requirements that I have extensive experience with include:

- I am very proficient in Python and building data driven apps and server-side code using Django, Django rest framework(DRF), flask and other server side frameworks (nodeJS, JSP & Servlets)
- I have built various custom automated programs and bots that perform redundant tasks efficiently, also the use of automated workflow programs like apache airflow.
- Experience with implementing run-time architecture services (caching, logging)
- Preferred experience with React, Nextjs and/or Redux, Experience in using different cache technique, CDN, Redis
- Working experience using GitLab, GitHub, Jenkins, and similar tools and technologies

Experience

Python Instructor

Readland Global

Sep 2021 - Dec 2022 (1 year 4 months)

I worked as a python instructor for international students who gather weekly online to learn about programming. I also taught my students basic logic building principles and taught them how to make simple games using scratch.

Python Developer

Lexalytics, an InMoment Company

May 2020 - Aug 2021 (1 year 4 months)

WHAT I DID:

I built a custom web crawler & scraper that navigated to a Law report site and extracted all data into a dataset to be processed. The results where well sorted into a csv format. Afterwards proceeded to use the large influx of data gotten to build a data model and pipeline for my startup. Our data ended up being implemented in Natural language processing related to major law reports in my country

It was like chatGPT for law reports

Education

NIIT Pune

Diploma of Education, Computer Software Engineering

Oct 2019 - Feb 2023

During my studies at NIIT, i gained advanced knowledge in software engineering and DevOps. I learned how to design, develop, and maintain software applications using a range of programming languages and tools. I also gained expertise in DevOps methodologies and practices, including continuous

integration and deployment, automation, and monitoring. My education at NIIT equipped you with the skills and knowledge needed to work effectively in software development teams and to contribute to the success of software

Licenses & Certifications

Building a Personal Portfolio with Django - LinkedIn

AUgbz8mlqNqEMFMYUOi3DaXvyW3L

Advanced Certificate in Information Technology (Software Engineering) - NIIT

Pune

R173028901060

Skills

Databases • TypeScript • React.js • DevOps • Flask • Web Scraping • Django • REST APIs • Continuous Integration and Continuous Delivery (CI/CD) • Amazon Web Services (AWS)
