SKILLS

Below is a list of my major skills, in parenthesis are the various languages, libraries or tools i use alongside my knowledge and logic in the development of applications.

- Server side programming(PHP, Python, Django, DRF, Flask)
- Frontend Web Development(HTML, CSS & Javascript, React)
- Blockchain Development (Solidity, Hardhat & EVM, web3, ethersjs, truffle)
- Database Management & Architecture (Microsoft SQL Server, mysql, phpmyadmin, pgAdmin & postgresql)

EDUCATION

NIIT /// , Computer Software Engineering -> 2019 – 2020

Advanced Certificate in Information Technology (Software Engineering)

Date Issued Dec 2019 · No Expiration Date

Credential ID: *R173028901060*

EXPERIENCE

Lexa Analytics -> 06/2020 – 06/2021

IKOYI /// BACK END DEVELOPER

- I was involved in web scraping using various python libraries like selenium, scrapy and other custom written web scrapers and crawlers.
- I wrote custom automation programmes built to scrape huge loads of data from a public data repo and convert, clean and process retrieved data into human readable format.
- Building of backend engine with a simple frontend interface (UI) to relate with our data pipeline.

Readland Global -> 05/2021 – 12/2021

INSTRUCTOR

- I introduced logic building principles needed to get started with the idea of programming and its concepts.
- I worked as a python instructor for international students who gather weekly online to learn about programming
- I taught how to make simple games using scratch.
- I taught python as an introductory programming language and we built simple applications like calculators and age calculator.
- I was teaching international kids (aged 11-14) how to run python programs in the terminal and powershell
