Summary

Innovative Software Engineer adept at working with customers, team members and project leaders to accomplish software engineering and updating tasks according to timelines. Skilled working with wide range of front and back-end technologies to produce and evaluate code.

Experience

Full-stack Developer
Altclan
Jan 2023 - Present (1 year 1 month)
Developed a secure custom authentication system using Django (django-allauth, dj-rest-auth, simplejwt), reinforcing user login security with Redux Toolkit.

Contributed to building a robust SQL database, implemented MVC architecture for REST API using Django Rest Framework.

Designed a user-friendly product system with a streamlined search bar using minimal JavaScript code. Implemented efficient front-end display of filtered data, dynamically retrieving information from the backend based on parameter filtering or keywords.

Created a data generation script with faker and factoryboy for testing and data analysis, ensuring a smooth application release

Python Instructor
Readland Global
May 2021 - Sep 2021 (5 months)
Conducted engaging and interactive online Python programming sessions for international students, fostering a collaborative learning environment.

Guided students through the fundamentals of programming, emphasizing basic logic building principles to instill a strong foundation in coding concepts

Introduced students to game development using Scratch, a visual programming language, enabling them to create simple yet interactive games.

Empowered students with logical thinking skills, enabling them to approach programming challenges with confidence and creativity..

Back End Developer
Lexalytics, an InMoment Company
Feb 2020 - Aug 2020 (7 months)

Developed a custom web crawler and scraper to extract comprehensive legal data from a prominent law report website, ensuring a steady influx of up-to-date information for analysis.

Engineered a robust data processing pipeline to clean and organize the extracted data into a structured dataset, enhancing accessibility and usability.

Implemented data modeling techniques to leverage the large dataset, creating a powerful foundation for Natural Language Processing (NLP) applications.

Education

NIIT Pune

Diploma of Education, Computer Software Engineering
Oct 2021 - Feb 2023
During my studies at NIIT, i gained advanced knowledge in software engineering and DevOps. I learned how to design, develop, and maintain software applications using a range of programming languages and tools. I also gained expertise in DevOps methodologies and practices, including continuous integration and deployment, automation, and monitoring.
My education at NIIT equipped me with the skills and knowledge needed to work effectively in software development teams and to contribute to the success of software

Licenses & Certifications

Building a Personal Portfolio with Django - LinkedIn
AUgbz8mlqNqEMFMYUOi3DaXvyW3L

Advanced Certificate in Information Technology (Software Engineering) - NIIT Limited
R173028901060

Professional Diploma in Information Technology (Software Engineering) - NIIT Limited
S22302890021

Skills

E-Commerce • Software Design • Program Creation • Microsoft SQL Server • C# • ASP.NET • Web Services API • Redis • .NET Framework • ASP.NET MVC
